In the second position, the 訓読み is always voiced, with the exceptions of only a few words in which this 漢字 is preceded by a verb in its る form (such as 至る所, the third example in Entry 13, page 9).

The 音読み, by contrast is almost never voiced in second position; the only time you are likely to encounter it voiced here is in the second example below.

In the third position and beyond, however, there is no way to predict on first encountering a compound whether or not the 音読み is voiced (the 訓読み never appears after the second position).
