第1章 漢字 226–250

漢字 1: Attach (付)

付

付

Attach, in both physical and figurative senses.

Composition

English	Person + Tiny/Inch

Meaning ↔ Glyph Components

Attach the [human] to the [tiny] parasite.

Pronunciations

	音読み	訓読み
Cm.	フ (FU)	つ (tsu)

In general the reading in the second position will be つ, and it always is when this 漢字 is preceded by another 漢字 that is read with its verb stem: 見付ける (み つける: *to find*) is one example, as み is the stem of the verb 見る.

It is only when the preceding reading does not form a verb with its 漢字 that 付 will sometimes become voiced as づ: 気付く (キ づく: *to notice*) and 名付ける (な づける: *to name*) are examples of this, as 気 and 名 do not form standalone verbs with キ and な in the way 見 does with み.

Match. Combine.

This is a 漢字 you will encounter frequently, as it forms many compound verbs (such as in the third example) that suggest some kind of reciprocal action between people or things. These words are often translated into English with the phrase “each other”: 押し合う (おしあう) “to push each other”, is one example.

	音読み	訓読み
Cm.	ゴウ (GŌ)	あ (a)

ゴウ is the most common choice in the first position, but both it and あ occur frequently in second position.

This 漢字 can also act like 買 in absorbing its ひらがな accompaniment in certain compounds.

These 2 readings only occur in a few words, and always double up with the 音読み of the 漢字 that follows them (as the small カタカナ ッ indicates).
