By comparing the second and third examples above, we see that the noun in example 3 has “lost” the い that would be present if the kanji were in its -ます verb form, かいます (買います). It is in a sense implied, based on the hiragana ending after 上. Unfortunately, there are no hard and fast rules for this aspect of the language, and it can be frustrating when such words are encountered. Example 3 can be seen variously as 買い上げ、買上げ、or even 買上 in different dictionaries.

Nonetheless, not many kanji present with such difficulties, and once a ‘primary’ word (usually the -ます form of the verb) has been learned, its related nouns will be easily recognized.
